Lawyer Robert F Kennedy Jr stated on Instagram –

”The published peer reviewed medical literature supports Ivermectin as a miraculously effective treatment for COVID-19. The drug’s scientifically proven success creates a new dilemma for Anthony Fauci and his 20 billion dollar vaccine enterprise. If FDA approves Ivermectin as a treatment, none of Dr. Faucie’s mischievous vaccines will be eligible for Emergency Use Authorisation. All of them would be measured against a new standard of care against which none of them can complete. And widespread use of Ivermectin will mean the disappearance of the pandemic as infection fatalities drop below mortality rates for seasonal flu.

These considerations drove Dr. Fauci’s fraudulent and genocidal campaign against hydroxychloroquine last Spring. His current posture towards Ivermectin is to ignore it for the moment—and let patients die—while rushing his vaccines in to saturate the market so that he can claim credit when death rates drop. Then they will stop the PCR testing and the pandemic will miraculously disappear. The Medical Cartel will attribute COVID’s abolition to lockdowns, masks, surveillance and vaccines. The elites will declare Dr. Fauci a ”human rights hero”, and we will all be stuck genuflecting to Big Pharma, its totalitarian controls and its infernal boondoggles for eternity. I hope I am wrong, but I’ve known Dr Fauci for decades. I’ve seen all his homicidal filmflams and swindles. He is Boss Bunco Artist for the Medical Cartel and we are all his pigeons (Read my upcoming biography of Dr. Fauci, ”Teflon Tony—Big Pharma’s Coup against Democracy”. Published this coming February 2021 by Skyhouse/CHD)”— R.F.Kennedy Jr
