

ALFRED LAMBREMONT WEBRE, CHAIRMAN, MARS' BOARD OF ADVISORS, TELLS LEADING SPANISH NEWSPAPER "MARS IS INHABITED BY HUMANS"

Alfred Lambremont Webre, chairman, MARS, in Spain's *La Vanguardia* in September 2009

BARCELONA, SPAIN (LA VANGUARDIA) September 10, 2009, by Ima Sanchis

Alfred L. Webre, director, Institute for Cooperation in Space (ICIS):

"Mars is inhabited by humanoids."

Webre: I am 67 years old. I was born on a naval base in Florida during the Second World War. I live in Vancouver, British Columbia. I am a Doctor of Laws and a judge on the Kuala Lumpur War Crimes Tribunal. I am married and have a son and two step-daughters.

We live in a universe of intelligent origin. There is evidence that there are ethical civilizations more advanced than ours involved in the process of our development.

La Vanguardia: *Give me evidence.*

Webre: Statements by government employees who have witnessed the United States participate in programs involving secret relationships with certain extraterrestrial civilizations.

La Vanguardia: *Does that mean it has already been in contact with extraterrestrials?*

Webre: Yes, since the Fifties, the U.S. government, according to these witnesses, has been working secretly with them...

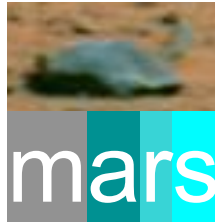

Andrew D. Basiago, the son of a CIA officer, was enrolled at age seven in a secret program for gifted and talented children, who were trained to be ambassadors to extraterrestrials.

La Vanguardia: *Any contact?*

Webre: He met with three astronauts from Mars at the Curtiss-Wright facility in Wood Ridge, NJ in 1970 as the Martians were completing a trip to Earth. In January 2009, Virginia Olds, an employee of the CIA, confirmed that the CIA knows that there is a humanoid civilization of one million living beneath the surface of Mars.

We believe that around 9,500 BC, debris fragments from the *Vela* supernova explosion entered our solar system and damaged the ecology of Mars. The Martians – some 150 years more advanced than us ethically and technologically – took refuge beneath the surface of their planet.

In December 2008, we published a report that includes photographs taken by NASA's rover *Spirit* that identifies several species of humanoid beings and different animal species, as well as carved statues and built structures, on the surface of Mars. This article can be found at www.exopolitics.com.

**Webre tells La Vanguardia newspaper that
"Mars is inhabited by humans" – page 2**

La Vanguardia: *There are three astronauts that have seen extraterrestrial life.*

Webre: Yes, Buzz Aldrin, who flew on, Apollo XI, said that when they reached the Moon in 1969, there were two major alien spacecraft across the large crater in which they landed. His version was later verified by NASA officials.

La Vanguardia: *This stuns me.*

Webre: Dr. Steven Greer, director of the Disclosure Project, has collected over 500 testimonies from senior military, government and intelligence officials who witnessed the ET presence. These were made public in May 2001 at the National Press Club in Washington.

La Vanguardia: *Mexico, Chile, Brazil and Peru have made public their files on UFOs.*

Webre: Recently, they were joined by France, Sweden, Denmark and the UK, which brought out 7,200 records collected by D155, a secret UFO unit of the Ministry of Defense (MoD).

La Vanguardia: *Why not divulge the existence of life on Mars?*

Webre: For political reasons.

Therefore, MARS will be bringing a claim under the Freedom of Information Act (FOIA) to require that NASA acknowledge the existence of intelligent life on Mars.

La Vanguardia: *And why not present themselves in society, the Martians?*

Webre: Ours is a world that we can assume is under a quarantine order imposed by the government of the Universe.

La Vanguardia: *And that quarantine ends now...*

Webre: We believe that ethical extraterrestrial civilizations have used the UFO phenomenon to acclimate us to their existence, and that between the years 2010 and 2020 we will begin to have open relations with those civilizations.

La Vanguardia: *And first contact will be with the Martians?*

Webre: Yes, because there are many mutual benefits. They can give us technology and expertise and we have a beautiful green planet that they can migrate to.

La Vanguardia: *Is this how the Universe works?*

Webre: There are many dimensions and universes parallel to our own. Some extraterrestrial civilizations come from another dimension, a parallel universe, which is why UFOs can appear and disappear.

La Vanguardia: *How are these civilizations more advanced?*

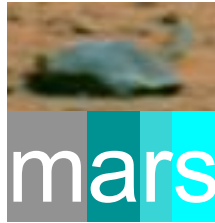

Webre: We are living in a Universe of organized and ethical civilizations that have mastered the time dimension, and these are the ones that are probably developing our reality.

La Vanguardia: *To what ultimate end?*

Webre: According to some theories, to rapidly evolve our civilization so that we leave the permanent war economy and transition toward a sustainable economy. Human consciousness has developed so that we are now ready to enter a universal age and enter into open relations with these other civilizations.

La Vanguardia: *They could throw us a hand.*

Webre: There is a primary directive to not interfere in the evolution of another civilization.

Webre tells La Vanguardia newspaper that “Mars is inhabited by humans” – page 3

But in a very short time, humanity will use quantum teleportation and free energy from space. We are in a transitional era in which we must choose between destruction or evolution.

Alfred Lambremont Webre

La Vanguardia: *Your work consists of studying the great government of the Universe?*

Webre: Exopolitics is the social science that studies the relationships between our human civilization and other intelligent civilizations in the Universe. One of our first steps toward universal diplomacy will be to successfully interact with the human civilization on Mars.

La Vanguardia: *I understand.*

Webre: I am working with Dr. Norman Miranda, chief of staff to the President of the UN General Assembly, for the United Nations to represent the Earth to the civilization on Mars.
