24. Pitfalls and Fallacies of the Orion Monetary System

It is a done deal that the current *financial system* will collapse this year within a very short period of time. In fact, the system has already collapsed more than two years ago when the Wall Street investment banking was practically wiped out from the map within a week in October 2008.

This happened shortly after the first huge **wave of Christ consciousness** was released on earth and allowed for more transparency and sincerity in human relations. This information is given as evidence for the basic statement in this essay: All dramatic and sweeping changes, we experience on earth, are associated with and triggered by significant changes in the energetic structure of human beings. They weaken the shackles of all incarnated entities that have been imposed on them in a perfidious manner by the Powers That Be and open them for the transcendental truth of All-That-Is. This is also the objective of this essay prior to Ascension of the author and his official appearance as an **ascended master** in front of humanity.

The *release of Christ consciousness* on earth is associated with the so called *Ra-Ta-experiment* which is explained by the channel *Cosmic Awareness* in his numerous messages. The author recommends the reader to check this information in order to better understand the current situation on earth. It is one of the clearest channels this author has ever come upon.

Unfortunately, the energizers and the group around this channel are intellectually not quite prepared for the information that has been given to them. This fact explains the redundancy in the messages and the somewhat narrow spectrum of topics discussed by this channel. For instance, the actual financial situation is not at all elaborated by this channel from a theoretical point of view, although it has made some good economic forecasts in the past.

Nonetheless, this source is the most reliable and extensive source in Internet (over 8000 pages of channelled messages since 1975). In comparison to it, most channelled esoteric information available in Internet can only be digested, if one is prepared to commit an intellectual *hara-kiri* before reading it.

The author mentions the Ra-Ta-experiment at the beginning of his discussion, because it gives the reader a clue as to when the financial system is expected to collapse this year. In anticipation of this event, a theoretical analysis of the factors that will lead to this crash may appear to be of secondary importance. It is quite probable that the financial crash will happen before this essay will be published.

The *second wave of Christ consciousness* was released in late autumn 2009, shortly before the final period of earth Ascension – 2010 to 2012 (last triad) – has begun. In this context the last year was a preparation for what will be manifested this year.

The *final third wave of Christ consciousness* has commenced this year and will reach its peak around spring equinox. The current revolution in Egypt is the first eruptive manifestation of this wave, which is closely associated with the history of this ancient country, although Christ energies flood the whole planet. It is expected that the Egyptian revolution will spread out to many other Arab countries and destroy the fragile balance of the current World Order as designed by the dark forces. One very probable consequence will be the disruption of oil supply to the West from the Middle East.

This event may trigger the financial crisis which has many fathers, but one mother – the **world inflation**, the unprecedented bubble in money supply that has undermined the foundations of the world economy. This inflation has been deliberately instigated by the dark forces and their proxies in the financial corporations by creating money out of debt and thin air in order to impoverish humanity and establish the **New World Order**. This has been the pronounced aim of the Powers That Be in the last several decades. This effort has exacerbated during the first decade of the third millennium.

*

Before the author begins with the analysis of the nefarious methods that the dark forces have employed in the past to destroy the financial system and the economy of mankind in order to enslave it, he would like to point out that their plan to establish the New World Order has already failed.

However, this does not mean that the financial system will not collapse. It will collapse to a much greater extent than the dark forces and their financial proxies, the banksters on Wall Street and in London city, have planned for. Instead of achieving the intended impoverishment of the masses, first and foremost, of the middle class, the financial Elite will be buried under the rubble of the upcoming financial tsunami. Precisely, they will lose very soon all their monies and power, and all their institutions, such as banks, funds, securitizations, stock exchanges, central banks, etc. will be abolished forever. In this way they will lose their financial leverage of manipulating humanity prior to Ascension.

As the **national states** have also been designed by the hidden governments to promote the New World Order on the long run, they will also financially collapse this year. In other words, there will be no more criminal bailouts to save the dark ones at the expense of the tax payers as means of enslaving the latter. The abolishment of the national states as operative units – the nations will remain - will be associated with the collapse of the **health care system, rental system**, and all other forms of human securities that have been promoted by the Powers That Be as part of the Orion monetary system with the objective to hold the people firm in their grip.

These institutions have been deliberately implemented to stimulate the survival (self-preservatory) fears of the masses about their future, as the current political discussion in the USA on the new health care reform of Obama clearly demonstrates. All these wrong concepts and structures stem originally from the primary idea of separation from the Whole and from hiding the fact that humans are unlimited powerful creators of their destiny, who are also responsible for the astral regulation of their bodies, so that no bank accounts or obsolete medical treatments can protect them from calamities, if the soul has a different plan from that of the incarnated entity.

*

Let us discuss in this context the concept of *securitization* in the financial system from a psychological point of view, as it is the central piece of fraud that creates the conditions of destructive interference in the economy and will cause its collapse this year.

The idea to secure one's life by creating bank accounts and saving money is so perverted and at the same time so deeply rooted in current pecuniary human thinking that one has to put the whole humanity on Freudian couch and analyse it for the next 2000 years, before it can be declared convalescent. Unfortunately Cosmic Providence has not foreseen that much time for those who will make up their mind to ascend. For those who will go along the path of further separation on planet B, the time of healing their mental aberrations will be unlimited.

What is the psycho-mental dynamics behind the concept of securitization of all aspects of human life? The primary faulty idea is that people are vulnerable biological beings that may suffer from diseases, injuries, financial, social, and numerous other imponderable events that are beyond human control, because these follow the random laws of chaos and incalculable probabilities.

This world view is a central piece of the camouflage, of the cover-up, that humans are responsible creators of their destiny and that not a single event can ever occur on earth, unless it has been considered by the entity in advance in infinite astral probability alternatives in the dream state. We create at night and experience at daytime. Without dreaming, there will be no living. Alternatively we can say that we live our dreams. From another perspective, we may as well sustain that our dreams are the only true reality and that our life in the 3d-reality on earth is an illusion of our true dreams. It all comes up to the same thing.

All events, one encounters on earth, are mirror images of the particular feelings and beliefs of the individual entity that serve as pedagogical means to make him aware of the fact that he is an inexorable creator of reality as being part of All-That-Is. The outer experience is of a secondary importance – the events one experiences are decors for the emotional and mental multidimensionality of the entity. Such experiences are empty signs and symbols for deeper realities that show him the way on his individual roadmap to Ascension and merging with the Whole.

Therefore, if one has negative experiences, for instance, a series of car crashes, misfortunes in business and in personal relations that are always associated with financial losses, what sense does it make to securitize such risks by paying even more money to anonymous fraudulent corporations to protect him from such undesirable events? In this case, one only perpetuates the psycho-mental causes of his misfortune on the next existential level. The perverted mind-set of being a helpless victim of imponderable circumstances is further aggravated.

This pattern of human behaviour stems from the wrong conviction that one has to solve his problems in the outer world by surrounding himself with huge hedges against all possible evils that lurk from the mist of unpredictable reality. Such a behaviour leads to curtailing the inherent, unrestricted creativity of human beings by dumping down the inner impulses of the soul that guides the incarnated entity to make the appropriate experiences in the 3d-reality.

Ultimately, the entity gives up his freedom of choice given to him by his soul and succumbs to his fears. He no longer explores life with an open mind, but opens the door for even greater emotional manipulations by various dark forces from the 4th dimension that hamper him in his spiritual evolution. This mind-set is underlying current society –from anti-terror wars and other atrocities of the Western nations against the rest of the world to rigid surveillance of

their own people on airports and other areas of social life. The Big Brother is watching you. Orwell's vision of 1984 does not belong to the past, but is already a reality and a foreboding of a grimmer future.

Let us be plain on this issue: One cannot do anything to secure his life, then life is created by the soul, and she is the ultimate authority on how it ought to be spent by the incarnated entity, and when it ought to be terminated. The agnostic ego of the incarnated entity lives in the greatest of all illusions that it has control over life.

It is driven by his fears to do something, anything, all the time in order to preserve his life – to earn money in order to eat and survive, to represent somebody in the society (the more you earn, the more you represent), to pay with precious money as to hedge an unpredictable future (the higher the amount of securitization, the more secure the entity feels), etc. Like the famous ant in the poem “why should she be calm and placid, when she is full of formic acid”, the formic acid being the fears of the entity, humans engage themselves all the time in worthless activities, instead of *being* powerful multidimensional, creative *beings* (tautology = principle of last equivalence): **Being a soul**. The soul, the higher self, is being - the fear-driven entity is doing.

*

A key point in the hidden agenda of the dark forces to enslave mankind is to use the current financial system to deepen the psychological conviction of incarnated human entities that they are separated from the Whole and thus an easy prey to unpredictable chaotic events. Money is considered to be the only safe haven in the 3d-reality and in this context the only goal of human existence. Money symbolizes not only prosperity, easy life, and popularity, but, first and foremost, safe life amidst death and organic decay.

As most entities do not believe in the immortality of the human personality and the soul, they must believe that have only one life to live, and that this life is hence very precious. Extrapolate these faulty beliefs on the mentality of the current Elite as human representatives of the dark forces and consider the fact that most of them are the current controllers of the financial system you will have a vivisection of all human evils on earth nowadays.

The financial Elite, be they Rothschilds, Rockefellers, Fed, American and Anglo-Saxon banks, and their CEO, some of which are clones of the dark forces (the Greys and the Reptilians), are, from a higher vantage point of view, not only the perpetrators – they are in the first place victims of their hypertrophied fears. They are deeply perverted entities, entrapped in their earthly Purgatory.

In order to contain their fears with respect to their imagined mortality and biological vulnerability, they see the purpose of their life solely in laying financial shackles upon all human beings, whom they deeply despise. While worshiping the Mammon they serve, they strive to make all humans slaves of the Orion monetary system. The more the masses are impoverished and under their control, the better and secure the Elite feel.

However, there will be no absolute security for the Elite as long as they do not believe in life after death or in Ascension. Only the idea of the immortality of the soul and the incarnated personality as part of All-That-Is can render the feeling of security, even amidst mayhem and destruction, as the coming months will eventually reveal.

Had the Elite have acknowledged this truth, they would not have been found in the financial sector, but among light workers. Fears have the propensity to create new fears, until they encompass the whole reality. The fears of the Elite have intoxicated the whole planet. Therefore, they are not satisfied with the total financial enslavement of humanity, but they also aim at controlling the people physically through an oppressive political system. This is the reason why they prepare society for the **New World Order** during the last several centuries.

This human condition was almost achieved by the Bolsheviks after the October Revolution in Russia. Similar conditions can now be observed, for instance, in North Korea and in Myanmar. The situation in Egypt before the current revolution was not much different.

The means of enslavement in the Western world are far more subtle, but not less heinous. When one perceives recent history of mankind from this perspective, one will soon realize that every human effort to progress spiritually and to achieve abundance for the people has been successfully pervaded by the Powers That Be and their human minions – the current Elite. This is the reason why true progress and enlightenment have never gained broad success on this planet.

In the financial sector, these obstructive practices include the abolishment of the gold standard, the establishment of the European Union, the introduction of the Euro, the intention to establish a free trade zone in North America, the usurpation of financial power by central banks, such as the Fed that are private or corporative institutions but have control over the money system of sovereign countries, etc.

The list of financial crimes of the Elite against the people is infinite, but they are not really discerned by the masses, who are lulled by fake social ideals. Some of these atrocities have been highlighted by critical journalists and independent voices in the last several years, which are marked by a gradual increase of transparency and a quest for revelation of all hidden facts.

*

The moral and ethical indignation that sweeps the globe since the beginning of this year is part of the emotional reaction of the people who are beginning to awaken for the atrocities of the Powers That Be and realizing for the first time in the history of mankind that they have been pawns to them for thousands of years. While emotions are the astral wings to Ascension of the incarnated entity, they are not sufficient enough to comprehend the mechanisms of human enslavement on this toxic planet. Therefore, let us elaborate the aforementioned facts from a neutral scientific point of view by employing the cosmic laws of constructive and destructive interference, before we delve into technical details.

It is a leitmotif of this essay that a separation from All-That-Is does not exist. Even if an entity sustains the illusion of such a state for a long period of time, it can only exist as a sentient being, if it is in a state of perfect constructive interference at a higher level - that of his soul.

Now let us elaborate this basic insight with another example. The Powers that Be, the Unholy six, especially the Greys and the Reptilians, have developed in the last decades, since they have started to cooperate actively with the Elite and the hidden governments on earth, new human clones through genetic engineering. As already mentioned above, about one third of the entities that now live on earth are such clones. However, they can only exist, if they are humanized by souls from the 4th and 5th dimensions. No genetic engineering can create

humans or other sentient beings, unless they contain energies and frequencies from the higher realms of All-That-Is. Their very existence is a proof that they do so under the condition of constructive interference within the infinite and absolute harmony of All-That-Is, even if they are not aware of it.

Most of these genetically created human beings are very young souls that are just beginning with their incarnation cycle and cannot root themselves firmly in the 3d-reality. The fraction of the soul (lower self) that is incarnated in such genetically engineered human vessels must be totally separated from All-That-Is as to guarantee the adequate 3d-conditions of physical density that such souls have chosen to experience at this low level of evolution.

As already mentioned, many CEO of large corporations are such clones of human entities, whose souls have finished with their earthly experience in this incarnation and have returned to the 5th dimension. In order to preserve the charade on earth, such entities do not necessarily die, but are exchanged by the Unholy six and their human proxies with clones, which harbour much of the memories and the personality of the previous entity.

The former president George Bush is, for instance, such a clone. The original Bush was eliminated about two years before the end of his second term and was substituted with a clone, because he became somewhat rebellious to the Powers That Be that pull the strings behind the curtain in Washington. They feared that he may become a potential danger to their plans with his uncontrolled remarks, a liability they did not want to share. They murdered him and exchanged him with a clone. The new version of him was due to the genetic engineering much more docile to the Powers That Be, to the hidden American government. The entity B. Clinton has been substituted by several clones already. This example is paradigmatic as to how the manipulation of humanity is arranged from the 4th dimension, although it can only exist with the help of the souls from the 5th that have decided to incarnate in such genetically created human bodies.

The author understands very well that some readers may find this information abominable and recoil, but they should keep in mind that modern mankind was created in the same manner by the Powers That Be some 13,000 years ago. Why not now? It is one thing to create a human biological vessel through genetic engineering, quite a different thing to help the incarnated entity evolve to a 5th-dimensional being.

In every incarnated entity on earth, there are two opposite forces that influence his mental and emotional body simultaneously and are in an incessant inner strife – the Forces of Light that forge his merging with All-That-Is and the forces of dark that push him into a deeper separation from the Whole.

Financial systems, societies, national states, armies, corporations, technological achievements are nothing else, but empty decors that prepare the scene for the eternal battle between the Luciferian forces, the fallen angels, and the Forces of Light. This inner strife is waged within each incarnated entity, so that the prodigal son can have his experience of separation and returns wiser to God. This is the ultimate eschatology of human existence on earth and on any 3d-planet in the solar universes.

Finally, it should be noted that the Forces of Light also have the right to eliminate evil human entities and substitute them with their own clones, if they pose a great threat to humanity. This was done, for instance, on a large scale in 1978-1979 when the hidden government of the USA, instigated by the Unholy six, planned a first destructive nuclear strike against the

Soviet Union at the height of the Cold War. Most of the entities on power, including the then President Carter, were eliminated and substituted with clones by the Forces of Light.

The entity Carter was however murdered by the dark forces, because he objected their criminal plans and was only then substituted with a clone by the Forces of Light, so that he could carry out his mission as enlightened president. The moral and ethical structure of this entity was fully preserved in his clone. The other minions of the dark forces were eliminated by the Forces of Light and their helpers on earth as to prevent a devastating catastrophe. The price for this crime committed against a bunch of evil entities was the divine redemption of humanity from total destruction. This episode was the darkest and most critical in the recent history of mankind, notwithstanding the fact that this is not known to the broad public.

Such interventions are part of the game that has been played for eons of time on this toxic planet. Let us recall that the body is only an instrument of collecting 3d-experience and has nothing to do with the personality of the incarnated entity. After Ascension, all human beings will have the possibility to choose their own body and change it at their discretion through imagination and direct manifestation. Contrary to the Powers That Be from the 4th dimension, they will not need to involve in primitive genetic engineering to create deficient clones that can only survive a limited period of time. Human beings will very soon begin to create from the soul level of unconditional love.

*

After this indispensable clarification as to how the Powers That Be actively manipulate mankind in general and the financial system in particular as to trigger its collapse, we must return to the cosmic laws of creation and destruction and explain why these manipulations fulfil the condition of destructive interference and will not only lead to a financial crash, but will also eliminate the influence of the dark forces on mankind before Ascension.

When an entity or a society decides to go along the path of greater separation from the Whole, it inevitably creates conditions of destructive interference all the time, as it no longer recognizes the laws of Creation as an inherent part of All-That-Is. Creation in separation lacks responsibility.

True Creation within All-That-Is is always responsible, as it is performed from the level of unconditional love, which is an esoteric circumscription for the cosmic condition of constructive interference. This truth will emerge as a key aspect after Ascension, when many incarnated entities will acquire the possibility to create by imagination, but will still have to learn how to do it in a responsible manner within the divine harmony of All-That-Is.

All structures that are created in a state of separation from the Source are intrinsically unstable and tend always to collapse at some point in linear time. The ultimate decision when such inferior creations ought to be destroyed is made in the higher realms or dimensions of All-That-Is, which render the energies for the existence of such structures and support the overall conditions of Creation. One may call such higher realms "God" or "Elohim", without affecting anything on the laws of Creation as presented in this essay.

Under these premises the current battle between the Forces of Light and the dark forces is, strictly speaking, not a real battle, but a camouflage thereof. Just as the ego may gain the illusion that it has control over the life of the incarnated entity, as long as the soul let it believe so, so do the Forces of Light let the 4d-entities from the Orion Empire believe that they have control over earth and humanity for some time. Ultimately, the outcome of this

symbolic battle is predetermined, as the decision for earth and mankind to ascend has been fallen at the highest levels of Cosmic Providence since eons of time.

*

The ego of the incarnated entity was initially created as an **external reference point of view** to that of the **Creator-Soul**. It ought to be a unique mirror-image of the soul, but it was never intended that the ego should take full control over the incarnated entity from the soul. It may only seem to be so. Especially in agnostic societies, such as current human society, this hallucinatory impression may cherish quite well for some time, as this has been the case in the last several centuries since the begin of industrialization of mankind.

During the so called “Dark Ages” (in German “Mittelalter”, Middle Ages), the connection of the incarnated entities with the soul was much more pronounced, probably due to the poor living conditions, where hope for immortality and eternal bliss was the only beacon of light in those dire human conditions. Much of the poetry at that time reflects this endeavour of humans to unite with God in the transcendental dimension.

Human ego is agnostic. And it has never been more agnostic than at this time. Like a kaleidoscope, the collective ego of our soulless mechanical time creates incessantly numerous illusionary images of its alleged autarky. These external images render the ego the false security and the erroneous conviction that it is the master of this human charade which it creates under extreme energetic limitations.

Especially in the industrialized world, where the number of material devices, such as phones, iPods, and all other child’s games that distract the incarnated entity from exploring the multi-dimensional nature of his soul has grown exponentially in the last few years, the separation from All-That-Is has reached an unprecedented peak. Under such conditions, it is no longer possible to have a further spiritual evolution. The conditions must, therefore, radically change, and the speckles removed from the blind eyes of humanity.

Ascension is the surrender of the ego to the soul. The ego must give up its illusion to be in full control of its destiny and merge with the higher self. This is the most poignant experience on earth and the most liberating at the same time. This greatest illusion of all times will be abruptly terminated this year.

Likewise, the illusion of the Powers That Be, the Unholy Six from the 4th dimension, that they control earth must end this year. This will not happen exclusively by waging a battle in the higher realms, as many channels from the lower dimensions, that have gained some popularity in internet, suggest. What is currently happening on this planet is a dramatic increase in the frequencies of earth and humanity that render the actions of the dark ones futile from an energetic point of view, no matter how many efforts they may undertake.

Darkness has to succumb to Light prior to Ascension. Under the condition of destructive interference Darkness will be deleted and substituted by Light. It is as simple as that. Only human mind wants things to be much more complicated, as to experience its fake autarky to the full extent.

This pattern can be observed in the behaviour of most incarnated entities. Their ego may choose to go along a certain path of experience that is not shared by the higher self. As the free will of the ego is respected by the soul, the entity may proceed with the realization of his intentions for some time. In this case he will eventually experience one failure after another,

one disaster after another, until he starts to contemplate as to why he has no success in creating the destiny he desires.

The entity will eventually begin to scrutinize his beliefs and emotions that have urged him to choose this particular path of experience and he may find out that they are not as honourable and spiritually elevated, as they initially seemed to be. He will then begin to question his motives and will substitute them with more loving and compassionate thoughts and feelings. By doing so throughout his life and during numerous incarnations, the entity reaches the ultimate point of 3d-existence, where he acts most of the time from the position of unconditional love, compassion, and maximal understanding, which is the position of the soul.

When this point is reached, the soul may decide that she has learned all the lessons of incarnation and separation, she intended to experience. The soul will no longer need her external reference point of observation – the ego. It will be put aside forever, and the incarnation cycle of the soul will be terminated. The infinite journey of the soul will continue on a higher dimension on her way back to the Source, but her earthly experiences will remain her treasures forever.

The gradual return of the prodigal son to the Father is accompanied by a series of negative experiences summarized as **karma**, whereas, in fact, these are experiences of the conditions of destructive interference that help the entity to evolve to a responsible creator. The best way for an incarnated entity to learn this, is to experience personally the consequences of his creativity. Human destiny has no other purpose, but to give the entity amidst his total amnesia vital clues that he is “a spark of God.”

Anything that human entities experience on earth is part of their conscious choice of Creation at a higher level. The Powers That Be are thus not evil aliens that have invaded earth at some point in time to oppress and annihilate humanity. They have already been part of the game, before some souls from the 5th dimension decided to incarnate on earth and have this particular experience with these 4d-creatures. The eschatological purpose of these souls was to find out, what they did not like – ultimately, the consequences and manifestations of total separation as mirrored by the behaviour of the Unholy Six, to which they have subjected themselves on this planet in a conscious and deliberate manner.

Their hallucinatory enslavement will end at the very moment, at which they decide to end up this game of illusion and renounce enslavement. They do not need to fight the dark ones and their human proxies in order to liberate themselves. This is the lesson that the Egyptian people are now learning. This will be the lesson that the American nation will have to learn this year as part of the overall liberation and enlightenment of mankind.

Let us not forget that the USA is still the citadel of the dark forces, from where they have effectively enslaved humanity for the last 60-70 years after the Second World War. The other citadel of evil, the Soviet Union, has already crumbled and is now fully under the auspices of the Forces of Light, as any discerning observer can easily find out by analysing the current political events and the tone of the mass media in these two countries.

Human entities are powerful creators. As soon as they make a conscious decision to return to the Source as responsible creators, it will be so. The greatest surprise, any human being will experience after Ascension in the 5th dimension, will be to find out that he is one of infinite other responsible creators, and that there is nothing else in All-That-Is but Creation.

25. The Orion Monetary System in the Historical Perspective

The collapse of the financial system and the current World Order, which did not evolve to the extent to become the *New World Order* as envisaged by the dark forces for the End Times, is an act of pure creation: The **creation of destruction**, which Goethe's *Mephistopheles* praises in "*Faust*". The crash has been prepared for many years by creating various local conditions of destructive interference on numerous levels of financial transactions. The overall condition of destructive interference is the gargantuan inflation of the total amount of money in circulation, which reached a ratio of 100 to 1 at the end of 1999 with respect to the real material production as measured in GDP. This ratio was more than doubled in the last decade with the help of numerous virtual derivatives and other "financial weapons of mass destruction" that were invented by the American banksters with an unparalleled criminal creativity.

The chief mechanisms of fraudulent money creation are well known to the specialists and a growing number of awakening people and can only be summarized at this place.

*

Before the **gold standard** was abolished by Nixon in 1971, the main mechanism of money creation was the *real inflation of retail prices*. The gold standard was abolished as a result of the speculations of the dark forces, in particular of the Rockefeller faction, which wanted to gain domination over their initial creators, the Rothschild faction.

They started to buy in the 60s all the available gold at the then fixed price of 35\$ per ounce. After that they deposited the gold they had bought in various banks and received from them new loans at the same amount. By using this fraudulent practice, which later became famous as "**fractional banking**", they acquired most of the gold at zero price.

The era of *fiat currencies*, of *paper money*, could now commence and allowed for even greater fraud. The world inflation began to accelerate exponentially, as money was no longer linked to real value. However, this time the inflation did not affect the retail prices that much, as it was the case before 1971 and until the late 70s due to the inertia of the economic system, but was manifested in the first place as an *inflation of corporative prices*. The huge increase of all equity indices in the following years was a clear indicator of this trend. The price of gold jumped significantly during this period to reach a peak of more than 1500 \$ per ounce at the End Times.

After gold was eliminated as means of exchange, the banksters were very quick to introduce the insidious "**fractional banking**" which helped them to buy out gold. In Europe, this practice is known as "**giro money creation**". As long as the gold standard existed, the banks were obliged to keep the same amount of gold in reserve as the money supply in circulation, because every individual person had the right to buy gold at the fixed price of 35 \$ per ounce at any bank.

With the abolishment of the gold standard this obligation was eliminated overnight. From now on the banks decided without any discussion with the governments to introduce the fractional banking, which is a key aspect of the treacherous Orion Monetary system. Although finance is the blood system of any economy, the politicians did not intervene and sanctioned this fraud, because most of them were, and still are, pawns of the dark forces.

This subordination of the political elite to the financial one is a key element of the planned New World Order by the dark forces and can be seen as an invariant pattern in all faked Western democracies. They are faked because elections in these countries have always been manipulated by the financial Elite behind the curtain and the results are most of the time predetermined, as it was the case with all elected presidents of the USA after the Second World War.

Fractional banking works as a miraculous device that creates money out of thin air. When a private investor deposits, say, 1000 \$ in a bank, the bank borrows 90% of this sum to other banks and debtors and keeps only 10% of the private loan as a reserve. This was the initial ratio of fractional banking when this Ponzi scheme was first introduced by the American banksters after the gold standard was abolished.

The official rectification of this insidious practice was that the overall *money supply* and the *rate of circulation* will grow to such an extent that it will no longer be necessary to have reserves at the ratio of 1:1, as it was the case during the time when the gold standard was valid. The *money acceleration* – the rate of transaction (circulation) of the total amount of money from one entity to another - was estimated to be in order of 6 to 8 times per year. Hence, the banksters decided to keep no more than 10% of the deposited money by private investors as reserve money. They applied this rule also to all kinds of transactions between banks.

The introduction of fractional banking allowed the banks to create money out of thin air in the order of 10 to 12 times. This can be easily calculated by the so called “**multiplier of fractional banking**”. It is a numerical quotient, just as all relationships are according to the Theory of the Universal Law. Out of the 1000 \$ deposited by a private client, the bank created now 10 000 - 12 000 \$, which it could lend to other private persons or institutions. The actual multiplier of fractional banking in the USA was estimated in the early 80s to be in the order of 12. In this case, the banks were actually holding only 8% of their assets as reserves in their depots.

*

As already said, the fraudulent practice of fractional banking is a central piece of the Orion monetary system that has led to the current world inflation. The Powers That Be know that *money is a substitute for energy*, and energy can be multiplied under limited conditions, before the conditions of destructive interference come into power and all *excess energy*, respectively, **excess money** is destroyed. Within All-That-Is energy cannot be created or destroyed according to the *law of conservation of energy*. But it can be multiplied (inflated) under limited local conditions, until the law of destruction comes into play.

Money inflation is physically achieved by expanding the *space*-dimension at the expense of the *time/frequency* dimension, as this is assessed in the theory of relativity. According to the Universal Law $E = E_A f$, energy is proportional to time f , $E \sim f$ and reciprocal to space $E \sim 1/s$, as $f \sim 1/s$. When we set space equivalent to the *amount of money in circulation* as measured by the surface, *2d-space*, of the printed paper money, we acquire a very precise measure of money inflation. In this case, money is a mirror-image of energy = space-time that expresses all the properties of the primary term in a perfect way.

This insight was possible only after the author discovered the Universal Law and applied it to finance. However, this knowledge has always been known to the Powers That Be, who have manipulated their Orion monetary system at their discretion as to enslave humanity.

Space-inflation of printed money is thus equivalent to *money inflation*. At the same time it is a *dilution* of energy, according to the Universal Law as shown above: $E = 1/\text{space}$. For a short period of time, this property of space-time as manifested by money cannot be perceived by human beings because of their limited perception and the lack of knowledge of the Nature of Energy = Space-Time, which is a leitmotif of this essay. They believe that money still has the same power, even when faked inflation statistics (see below) are taken into consideration.

However, there comes a point in time, when the inflation of printed money-surface (2d-space) becomes so huge that the condition of destructive interference comes into play and money inflation explodes virtually in the hands of the consumer. This happened in Germany during the Great Depression when people had to carry a basket full of paper money in order to buy one egg on the market. The American people are bound to make a similar experience this year.

The author merely furnishes the scientific, physical background of money inflation from the point of view of the new theory of the Universal Law, which explains financial matters much more easily than present-day economic theory. The latter has been made deliberately complicated by the Powers That be and their human proxies in the financial sector as to lull humanity and exploit it to the verge of financial and physical enslavement.

In an ideal, stable economy, the amount of money in circulation should not exceed the amount of industrial production and social services as measured by GDP. This follows from the law of conservation of energy. In reality, the amount of money in circulation worldwide was at the end of 1999 one hundred times greater than the industrial production as measured in the official statistics of GDP for the world economy. This phenomenon is defined by the author as **world inflation**.

Under the gold standard the inflation was primarily an inflation of retail prices and salaries, and was accompanied with real industrial growth, as this is currently the case in China. After the abolishment of the gold standard, world inflation accelerated dramatically, but it no longer was an inflation of retail prices. This gargantuan inflation was now created through debt or precisely out of thin air and lost its correlation with the actual material production, upon which any society depends in order to survive and prosper.

After the gold standard was abolished, the *tertiary sector* of the economy of the western industrialized countries grew steadily from modest 15% -20% before 1970 to 75% by the end of the second millennium, The biggest part of the current tertiary sector is, however, the bank sector, which is nothing else but the optical façade of the world money inflation.

In order to hide this fact, all national statistical offices on inflation in the Western world were instructed to only calculate the inflation of retail prices and even further limit themselves to the so called "*core price inflation*", which excludes all commodities and services that are still subjected to huge inflation rates due to growing, wild speculations.

What mankind has experienced in the last three decades is an unprecedented decoupling of the actual commodity values from their prices. The prices for commodities became an object of unlimited, greedy speculations, which were totally decoupled from real demand and supply. The steady growth of all commodities indices and house prices before the subprime mortgage crisis is a typical manifestation of this decoupling of prices from material values.

The buy-out of physical gold by the American banksters and the introduction of fractional banking were so successful that they decided to immediately implement it on a larger international scale. They applied this fraudulent practice in the following years to various other areas of finance with a growing amount of money in circulation and a greater sophistication in hiding their true intentions. The financial products differed optically from each other, but the criminal intent and fraudulent pattern remained invariant.

The western population, and later on, that of the whole world was completely dumped down by these practices, which nobody could really discern and expose as criminal and deleterious to the people. This situation changed dramatically after the crash in 2008 when a new, clearer perception of these criminal practices of the banks began slowly to emerge among some far-sighted journalists and financial experts.

The author remembers however the time before the current crisis, when he was a lonely voice of critical discernment in a desert of blind economic experts - be they Nobel Prize winners or paid journalists in the numerous financial channels, such as CNBC and Bloomberg that sprouted like mushrooms after rain as a medial cover-up of the worldwide financial fraud.

After the gold standard was abolished, the American banksters and some of their European allies went to the oil rich Arab countries and made a deal with the sheiks. They offered them to unleash an oil crisis, so that the oil price per barrel would skyrocket. The sheiks gave their consent, as any greedy person would do so in a similar situation. At that time OPEC did not exist. The oil shock came promptly in 1972 and was repeated in 1975.

All crises, humanity has experienced so far, are arranged by the dark forces; they are not random events as the mass media, which also belong to the dark forces, claim. The current economic order of humanity is structured in such a way by the Orion Empire that the controllers of earth can easily unleash a global crisis, each time they consider it opportune to oppress humanity.

The major economic sectors, such as fraudulent inflationary finance, centralized, oligopolistic energy supply, ineffective motors of combustion used as vehicles and power engines, backward agriculture that is currently dominated by a handful of monopolistic corporations, producing genetic manipulated seeds and other bio-chemical fertilizers, and food suppliers are some of the tools, which the dark ones and their human minions employ to trigger a planned crisis and to offset the prosperity of mankind.

In addition, they manipulate the elected governments to employ destructive economic policies, as we shall show below, or to instigate perennial wars around the globe that hinder true economic growth on this planet. The whole pattern of modern industrialization of mankind is dominated by deliberate deficiencies inserted in the system by the clandestine Orion Controllers. They create the condition of destructive interference on numerous levels of current capitalist economy that is inherently susceptible to systemic crises and collapses.

After the oil crises in 1972 and 1975, the sheiks became multi-billionaires over night at the expense of the world population which had to pay for the higher gasoline prices at the tank stations. This was the first huge wave of global impoverishment triggered by the dark ones after the Second World War in their heinous effort to establish the New World Order.

After this insidious act, the American banksters convinced the sheiks to invest their riches from the oil production in American banks by offering interest rates from 5 to 8%. At that time the practice of demanding or accepting interest rates was considered usury in the Arab

world and was practically forbidden. The sheiks were very happy to give their money to the American banksters, who promised them to multiply it within a short period of time.

Being naïve nomads a generation ago, they did not perceive that they have been chosen to become victims of a huge Ponzi scheme, just as the investors of Bernie Medoff did not suspect anything for many years, until he suddenly went bankrupt two years ago and the scam was exposed. Some of the brightest American brains happened to be his victims. The scheme which the American financial Elite employed to expropriate the Arab sheiks was, however, much more brutal than that of Bernie Medoff, because they knew that they will never go to prison. They did it the following way.

The oil money of the sheiks was given as loans through the World Bank to Third World countries. However, these loans were now multiplied by fractional banking. If the sheiks invested in total about 500 billion \$ between 1972 and 1980 in American banks, the third world countries received loans during this time in the order of 5 000 billions.

It was obvious from the very beginning that these countries could never pay back these huge loans. This was not the intent of the American banksters. The Third World countries were forced instead to mortgage the loans with their natural resources in case of default. In this way, the insidious dark ones gained physical control over the world resources. As a result, the American faction of the Rockefellers became much more powerful than its European counterpart, from which it originally had emerged.

In order not to be able to pay their loans back, the dark forces and their secret services took care that the Third World countries were embroiled in civil and other disastrous wars or were even directly attacked by the USA government, which has always served the interests of these dark ones. When the third world countries began to default one after the other, and it became evident that they cannot pay back their loans, the American banksters went to the sheiks and opened them that they have lost all their investments.

This scenario may sound quite familiar to the reader. It was only two years ago, when the Wall Street banks went bust. Immediately after that they blackmailed the American government to bail them out or else they will ruin the economy. As any true mafia boss, they always use the same argument: "Either you do what I tell you, or else..." Washington has voted since then two huge bailouts, plus two additional bailouts by the Fed, titled in euphemistic financial slang as "Quantitative Easing", such as QE1, QE2... QE3. Of course all these measures were done at the expense of the tax payers.

The state budget deficit of the USA skyrocketed since then. The financial crisis impoverished the middle class of America and virtually ruined the already poor people that comprise one third of the American population. Only the few rich became richer. This is the current disastrous situation in this country. Now back to our sheiks.

When the sheiks got it that they were ruined somewhere in the 80s, they were scared to death and were ready to do anything, the American banksters would suggest them to recuperate their riches. It was not that the sheiks put the blame on their bankers, as these dark ones had water-proved alibi: "We cannot do anything for your losses. It is the world order to be blamed for. We have no influence on politics of Third World countries. This is up to the big powers. We are not politicians, we are simple bankers."

They then suggested that the situation could be rectified, if the sheiks would continue investing in American banks and in the industry. In return they would receive modern weapons to

protect themselves from rogue states that menace the precarious balance of their puppet regimes. The American dark ones pointed at Iran, who had recently ousted the Shah and had become extremely hostile to the USA and the neighbouring Arab states. The sheiks had no other option, but to follow the advice of their robbers and to give them once again their money as to save their lifestyle of leisure.

In the meantime the American banksters decided to invent some new fraudulent practices in order to create new monies after they have wiped out the savings of the sheiks. The era of derivatives and other exotic “financial weapons of mass destruction” commenced. However, it was not until the late 90s that this insidious financial practice could really explode.

In the meantime the dark ones in the USA developed a second scenario in order to keep the sheiks hostages to their atrocious plans, as the latter began to feel tangibly uncomfortable with the machinations of their rogue bankers, which they now began slowly to discern.

Bush senior, the chief representative of the American dark ones, decided to instigate the first Iraq war. For this purpose, the Americans suggested to their proxy and CIA-agent Saddam Hussein to attack Kuwait, only to beat him afterwards in a spectacular manner in a phoney war that was officially designed in the mass media as a just cause to save the helpless sheiks. Some of the alleged atrocities of the Iraqi soldiers in Kuwait were filmed in Hollywood as it was revealed sometimes later by investigative journalists.

In this way, the dark ones in stripes and stars showed the sheiks in an unmistakable manner how precarious their situation was and needed few arguments to convince them that they can only survive under the military umbrella of the USA. After the first Iraq war in 1991, the sheiks gave up their sovereign rights willy-nilly to the new world power that has emerged after the end of the Cold War. It is important to observe that this criminal war was only possible, because the Soviet Union had already collapsed and did not pose any nuclear threat to the USA at that time.

After the dark American ones practically swallowed the oil rich Arab countries of the sheiks, they became even more avaricious. The second Iraq war and the Afghanistan war should be interpreted in the light of these facts. Afghanistan was of strategic importance because a pipeline was built there by American firms to transport oil from the former Soviet republics in Central Asia. Iraq was known to have huge oil reserves, and his dictator was a CIA agent who could be easily manipulated.

What the arrogant American dark ones did not properly calculated, was the severe opposition of the Iraqi and Afghan people against their invasion. This is paradigmatic for the tactic of all dark ones. They have been accustomed for so long time to control this planet and mankind in an unrestricted manner, that they cannot imagine a situation where the balance of power can be reversed.

The current revolutions in the Arab World are the logical consequence of this nefarious economic scam of the American banksters that was further aggravated by the criminal policies of the installed puppet regimes in the Middle East at the expense of the oppressed and impoverished Arab people.

Entities that live in total separation from the Source are not used to cope with a completely new situation, for instance, in one where the Powers of Light have the sway. They have been used to live in darkness for eons of time and to put the shackles on humanity in a clandestine manner without encountering any fierce opposition whatsoever.

While all their odious plans have crumbled in the last several years, the dark ones are now becoming increasingly helpless. Since the beginning of this year they have virtually lost all their power to effectively manipulate mankind. After their total surrender, most probably around spring equinox of 2011, the events leading to Ascension will accelerate in a dramatic manner in the course of this year.

This quick excursion in the recent economic past of mankind had the purpose to refresh the historical memory of the reader and to serve him as a roadmap to navigate through all human crimes and atrocities that have been committed by the dark forces in the last several decades prior to Ascension, as many of these facts will be revealed in the course of this year. The truth about mankind and its controllers will enable the people to make a clear choice— either to go to heaven or have more of the same hell on planet B that will remain under the total control of the current Powers That Be.

*

The broad introduction of numerous derivatives and other virtual financial products in the 90s opened the door for unlimited fraud on a worldwide scale. This practice was facilitated by the emerging globalisation of the world economy after the collapse of the Communist system in 1990 -1992. As a consequence, the world inflation began to grow exponentially. This could be observed in the unprecedented surge of all equity markets during the last decade of the second millennium. Dow Jones Index rose for instance from about 2500 points in 1990 to almost 11000 points by the end of the second millennium.

But the new level of global financial fraud tilted the world economy towards a greater imbalance between world inflation and material production. The conditions of destructive interference on all levels of economic transactions became more pronounced each year, as this could be measured by the growing exorbitance of banksters' bonuses.

The frequency of financial crises that swept the global economy exceeded any previous experience so far. Between 1997 and 2007 the world economy suffered two major recessions, the Asian crisis of 1997-1998, including the hedge funds crisis, and the crisis of 2001-2003 that were followed by the greatest depression since the Great Depression, which began in 2007 and is still going on. In the short periods of treacherous recovery between the crises, the foundations for the next crisis were laid with an exponentially growing criminal energy, as it was the case between 2004 and 2006 when the subprime mortgage crisis was deliberately instigated.

This last crisis will end up with a total crash this year that will eliminate all financial structures of the Orion monetary system and will lead to a collapse of the capitalist economic order as it has been known for the last 200 years.

*

The amount of virtual derivatives exceeds currently many times the actual value of industrial production worldwide. These derivatives are fraudulent methods of creating monies out of debt or thin air. They have forged the world inflation to an even greater extent than the fractional banking. The latter was renamed at the same time in financial slang to “**excessive leverage**” of debt and toxic loans in the order of 30-40 times, as officially announced at the begin of the current depression. This means that the banks have practically no reserves at present to cover their losses.

In addition to the veritable explosion of virtual derivatives without any real value, the excessive leverage of the banks contributed decisively to their actual insolvency since October 2008. The total amount of toxic loans of the biggest American banks is estimated to be between 2.5 and 5 trillion \$. This sum is, however, peanuts in comparison to the amount of virtual *collateral default obligations* (CDO) that these banks created in a criminal fervour during the last decade.

At the height of the current depression, the amount of CDO was estimated to be in the order of 600 - 650 trillion \$, which is 40 times greater than the actual industrial production of the world economy measured as a fraction of GDP (one third of world GDP of about 45 trillion \$). These virtual securitization products were mainly created by American banks. The ten biggest American banks have issued and possess about 90% of all derivatives worldwide. JP Morgan alone has CDO of 95 trillion \$ in total. This sum is one thousand times bigger than the capitalisation of this bank on the New Yorker stock exchange.

At the same time this bank holds the majority of all shorts in the silver market. The current campaign “Crash JP Morgan, buy silver”, initiated by the critical journalist on financial affairs Max Keiser (Russian Television), may eventually lead to the bankruptcy of this financial citadel of the American dark ones. This event will undoubtedly unleash the crash of the worldwide financial system.

This is one possible scenario, how the financial collapse may start this year. But there are many other probabilities that will soon superimpose to create the ideal condition of destructive interference in the banking sector and will trigger this event. Here we have the same situation as in the famous saying that “all roads lead to Rome”, especially at the time of its decay.

All CDO, silver, and other shorts, and all outstanding assets and loans that the big banks harbour as “toxic loans” have been taken out of their official balance sheets since 2008 with the explicit permission of the US- and other western governments. Otherwise they should have declared bankruptcy three years ago. After the American and international banksters discovered the advantages of creating virtual financial products out of thin air, they have now invented the “**creative accounting**”, which is yet another euphemism for impertinent fraud.

In their overt criminal activities they are actively supported by the central bank Fed, which is in the private hands of these banks. The Fed has fictively bought many toxic debts from these banks since 2008, but has kept their volume secret to the public. Trustworthy financial experts are convinced that the Fed is already insolvent, notwithstanding the fact that it can create billions of dollars with a click on the computer, as its chairman, the famous “helicopter-Ben”, proudly announced in front of the US-senate.

This financial situation is further aggravated by the fact that all major buyers of US-debt, such as China, Japan, Russia, and other countries have stopped buying US-treasures and have decided to substitute the dollar as world exchange currency with a basket of their own currencies.

While the financial banking system is de facto insolvent since 2008 and can only exist on life-supporting measures at the expense of the tax payers, the banks have continued with their scam by paying their employees huge bonuses and salaries (\$500,000) in average for all Wall Street banksters in 2010), which are ten times bigger than the average salaries of qualified engineers in the American industry.

At the same time, the debt of the American nation has skyrocketed. When all outstanding debt positions of the federal government, the local governments, the health care system, the rental system, the private debt of the citizens etc. are considered, the total debt, as calculated by the experts, has reached the scary amount of 200 trillion, which is 13 times bigger than the GDP of this financially ruined country.

This sum is still only one third of the total amount of virtual derivatives, which the American banks possess or have put in circulation around the globe. A large portion of it is owned by foreign countries and investors. After the USA has crashed this year, they will have to write down their US-investments and will also declare bankruptcy.

This mixture of negative trends will create a perfect storm in the financial system this year. All parameters point to the bottom - the bottom being the total destruction of the Orion monetary system worldwide. This will be the most creative and liberating act in the history of humanity.

*

From this succinct economic overview one can easily conclude that the conditions of destructive interference in the financial sector have long reached the tipping point, where a deadly tsunami can be unleashed any time soon to wipe out all the assets of the banks and other corporations, including the savings of the people.

The intent of the dark forces was to trigger this event at their discretion in order to impoverish the world population with a single stroke and thus introduce the New World Order. This was counterfeited by the Forces of Light on numerous occasions. They deliberately postponed the worldwide financial crash for this year, when the dark forces will be fully handicapped by the new high frequency energies on earth and will have no longer the power to promote their insidious plans. The Antichrist, the Beast, must finally surrender.

The advantage of postponing the financial crash for this year has several tactical and strategic advantages from the vantage point of view of awakening mankind and the Forces of Light, which are the true keepers of the legitimate aspirations of all human incarnated entities:

- 1) The crash will take place within a very short period of time and will wipe out the power of the dark forces in the financial sector, which has always been their stronghold. This event will be so sweeping that the expropriated financial Elite will not be able to exert any opposition or to undermine the subsequent reforms, as they have always done in the past.
- 2) The postponing of the crash at a later date will shorten the period of tribulations during the End Times. The hardship of humanity will be thus shortened in the time dimension. The lack of any opposition on the part of the dark forces will allow for the immediate implementation of simple, just systems of food and commodities exchange as to meet the needs of the population after the crash. In many places simple barter systems will be implemented that will be directly controlled by the people. No misuse or corruption by some greedy entities will be allowed during the End Times.
- 3) The time point of the financial crash will coincide with the time of revelations, when all criminal acts of the dark ones will be exposed in the mass media.

This strategy has, however, some disadvantages. The time of revelations and spiritual evolution is much shorter than previously envisaged by the Forces of Light. The dramatics and the

intensity of the upcoming events will, on the other hand, create a favourable situation, where the rug will be very effectively pulled away from under the feet of the political, financial, and economic Elite, so that they will no longer have the possibility to meddle in the shaping of the new destiny of mankind.

The full power will be given to the people. They will be guided by some ascended masters and enlightened light workers, who will work in close cooperation with the Forces of Light. The latter will show themselves this year, after they have postponed their “first contact” with humanity for the last three years. The reason for this delay was that the dark forces were deeply entrenched in human society and had no intent to give up their power without creating mayhem on earth and eradicating many human beings.

This danger has now been effectively averted and the probability of first contact has become a certainty. The build-up of favourable energies of Christ consciousness has exponentially grown since the opening of the star gate on 10.10.10 and will most probably erupt around Equinox this year, when the last wave of Christ consciousness will be released. Parallel to this phenomenon, there are myriads of other energetic events and processes that build the conditions of constructive interference for earth and humanity to merge with the high frequency energies of the 5th dimension in preparation for the final Ascension.

*

The total financial crash of the Orion monetary system and the collapse of the current capitalist order will inevitably undermine the foundations of the western type of **national state**, which is based on three pillars: the *fiscal system*, the *rental system*, and the *health care system*. The fiscal system, with all its ramifications, comprises about 45-55% of the national GDP of the western, industrialized countries. The health care system makes for 16-19% of the GDP of each country and the rental system is in the same order as the health care system.

All three systems will go bust immediately after the financial crash. This will lead to the abolishment of the national state in its current pecuniary form.

The national state has been the chief cause of separation of incarnated human entities on earth. It has been the primary reason for all wars that have chronically devastated humanity and have hampered its progress. Just as the Orion monetary system, the national state was deliberately introduced by the Powers That Be/The Anunnaki to keep the incarnated entities in total subordination and in a state of permanent calamities.

For this reason they, the Anunnaki (the Orion Reptilians), introduced long time ago many different languages and created deliberately the famous “Babylonian confusion of languages” (in German “Babylonische Sprachverwirrung”) among human beings.

The current national states have historically evolved around such language populations, which were, by and large, divided by linguistic barriers from their neighbours. Where national states included minorities based on different languages, this linguistic division has always led to perennial wars and national catastrophes. The history of the Balkan states is paradigmatic for this trend. These nationalistic frictions were shamelessly exploited by the big powers to promote their egoistic imperial goals throughout the globe. This was the actual fall from grace of humanity for many thousand years. The End Times will finally terminate this vicious circle of incessant wars and destructions.

This is part of the overall divine plan for Ascension of mankind in the End Times. As the current civilisation is a product of all wrong human ideas of separation from All-That-Is, all its structures are also highly unstable and must be abolished during the End Times. This destruction will be accomplished in the course of this year. The next year will be fully dedicated to the preparation of mankind for Ascension and will represent an anti-climax to the destructive events that will take place this year.

There is virtually not a single social structure in current society that is not biased by the wrong idea of separation. Such systems will no longer exist in the 5th dimension after Ascension. Therefore, they must be eliminated in the course of this year, so that the people can begin to adopt themselves to the new conditions, which they will experience after Ascension. The lesser the distractions from the outer world are, the higher the level of introspection and spiritual evolution of the incarnated entities.

Human beings will never be able to discern all the pitfalls and fallacies of the Orion monetary system that forges their basic survival fears, unless they become free of it in their daily activities and begin to live in a state of true spiritual abundance. True abundance is always spiritual. All-That-Is is Spirit –it is “Weltgeist” (Plotinus), and not the Zeitgeist of Mammon.

The financial crash will most probably take place after spring equinox and will dominate the world events during the whole summer. The world financial order will be wrapped up around 11.11.11 when the last but one star portal will be opened. This date will herald the final stage of preparation for Ascension. There is very little time left. As *time/frequency f* will accelerate exponentially in the coming months, its reciprocal value – *conventional time t* - will be significantly shortened, so that the future events, we are talking about, will seem to occur in a highly accelerated modus.

26. The Theory of Macroeconomics Promotes the Orion Monetary System

It is not the objective of the author to present an academic discussion on the macro- and microeconomic factors that will trigger the upcoming financial collapse. This effort has been accomplished many years ago, when he integrated the major economic teachings of modern times, such as *Keynes theory* on anti-cyclic fiscal regulation and *monetarism* (initially *Austrian school of economics*), on the basis of the new theory of the Universal Law in a simple axiomatic, straight forward manner that can also be understood by non-specialists. A summary of his lectures can be found in Internet in German language.

In this discussion he will furnish the proof that all economic theories that have been elaborated in the last 150-200 years, since modern capitalism has begun, have led to the development of **world inflation**, which undermines the stability of any sound economic activity and promotes the idea of the Powers That Be to establish the New World Order.

Both theories were created in the two countries, from where the major factions of the dark forces on earth operate – the Rothschilds in the UK and the Rockefellers in the USA. They are, however, proxies, human slaves of the Powers That Be, of the Unholy Six from the Orion Empire. Throughout history, these families, which mainly constitute of reptilian shape-shifters, have amassed huge powers that they have misused on virtually every occasion. The history of their crimes should be the topic of many books and revelations.

At this place, it is important to observe that they have been the promoters of the two basic macro-theories that dominate current economics and political decisions – the theory of Keynes of anti-cyclic intervention of national governments during recession and the theory of monetarism of *Milton Freedman* and the *Chicago school* that promotes the idea of an independent central bank which should exclusively regulate the economy with the help of variable interest rates. The political version of monetarism is also known as *neo-liberalism*.

*

After the negative experience during the Great Depression, when the banks restricted their lending activities and aggravated the crisis by creating “tight money”, Keynes suggested that the government should take the lead in economic crises, which are regularly occurring in a capitalist type of economy. He suggested that in times of recession it is appropriate for the national government to make debts and increase money supply as to stimulate industrial production and consumption. When the economy begins to grow, the state will pay back its debt with the higher revenues which it will collect during the years of growth. This is the core of Keynes’ anti-cyclic approach of navigating the national economy through fiscal stimuli along the bumpy capitalist road of bubbles and busts, of booms, dooms and glooms.

This advice was however carried out much further than Keynes’ recommendation. The Keynes theory was misused by all western governments, who created new fiscal debt also in periods of economic growth. The current catastrophic fiscal situation in the UK and the USA is the result of this unrestricted and uncritical implementation of Keynes antic-cyclic theory of governmental intervention during recession also in times of economic prosperity.

This theory was very popular in the post-war time and was excessively applied by all western governments. As a result of this uncritical implementation the inflation rates in the 60s and 70s were double-digit in most industrialized countries.

The difficulties of the governments to contain inflation triggered the counter-movement of monetarism, which was a continuation of the main ideas of Austrian school of economics as further propagated by *London School of Economics*, which is totally under the hidden influence of the Rothschild family. The American branch of this economic teaching was the Chicago school of monetarism which was sponsored by the Rockefeller faction. It is not a coincidence that the current President comes from this city. Their chief argument was that the state and the government should not intervene in the regulation of the national economy by creating fiscal debt, but should leave it to the regulatory powers of free capitalism. The era of neo-liberalism was born.

For this purpose the monetarists suggested that an independent central bank should acquire the exclusive right to adjust money supply in times of recession and growth by using variable interest rates. In this way the central bank will be able to create “cheap” or “tight money” and thus regulate money supply.

In a recession, the central bank would lower interest rates and cheap money would be created. Cheap money would increase money supply, as companies would be inclined to borrow more money for investments, and this would stimulate the economy. In times of growth, the interest rates of the central bank would be raised. Tight money would automatically restrict money supply and the economic growth would not lead to inflation and financial bubbles due to overheating the economy. This was precisely what happened when Keynes’ anti-cyclic fiscal intervention was implemented by the governments in times of economic growth.

Both theories were originally designed to promote the hidden agenda of the dark forces and were thus intended to achieve the opposite effect, of what they theoretically preached. The academic make-up of these theories has practically lulled all prominent economists up to the present day with respect to their true function.

The Theory of Keynes was a blank check for the western governments to create new fiscal debt at the expense of tax payers and thus impoverish them. The taxes reached in the 60s and 70s fifty and more per cent of the income of the working population in the western countries, whereas the corporations were exempted from most taxes.

The Orion monetary system is in the first place an economic system of big corporations, which are ruled through hierarchic structure and can be easily controlled by the Powers That Be from the top. For instance, they can substitute any CEO or manager with a docile clone created through genetic engineering or through a shape-shifter of the Reptilian-type, who will promote their hidden agenda from the top without any checks and balances.

Although the governments are constituted by elected representatives, they in reality also carry out the hidden agenda of the dark ones, however, to a lesser extent. The percentage of clones among politicians is somewhat lower than that of CEO, because politicians operate in the limelight of mass media and such substitutions through clones may not always fulfil the requirements of a proper camouflage that cannot be discerned by the masses.

It is, nonetheless, important to reiterate that the true governments of all western democracies are the hidden governments of the dark ones, such as the *Trilateral Commission* and the *Council of Foreign Affairs* in the USA, or the *Bilderbergers* in Europe, who pull the strings behind the scene and not the officially elected ones. They are the ones who make the final decisions with respect to fiscal or any other national policy.

The financial and social policy of the current puppet of a black president in the White House (observe the symbolism of “Black and White” for the current duality of human experience) is paradigmatic for the kind of hidden political agenda that only serves the interests of the financial Elite, where most of the dark ones are to be found: A Dark president for the Dark Ones – what an irony! “Yes, we can” deceive you anytime!” was their last arrogant cry and a deliberate slap in the face of the ignorant American electorate.

This explains why the theory of Keynes was used as alibi by the hidden governments to indebt all national states even at a time of growth and to transfer this debt onto the tax payers, either through voting higher taxes or austerity programmes. In this manner the people could easily be impoverished in a clandestine manner by putting the blame onto the ruling parties, which of course could be substituted in the next elections. With the help of this political charade, the hidden governments prepared the people of the western nations for their role as future slaves of the New World Order.

To achieve this goal, they made them first fiscal slaves of the national state. In a second step, the dark ones intended to eliminate the national states by triggering a worldwide financial and economic collapse which would lead to a default of the western states. This goal was almost achieved in 2008, but it was then mitigated by the hidden intervention of the Forces of Light.

To this end the dark ones employed the theory of monetarism in a second step to cover up their true intentions. This theory rendered the central banks an unlimited financial and political power that is not sanctioned by any independent authority such as the legislative. The gate for all kinds of fraudulent practices at the highest international level was widely opened.

Off-shores companies were founded en masse that operated outside any national laws, where all the monies of the people could be illegally transferred.

Political efforts, being made to control money flows, were condemned as obstructions to free capitalist economy by the Powers That Be and their minions in the media and had no chance to become national laws. Three years after the crash in 2008 and numerous international meetings of G8 and G20, accompanied by loud announcements to finally control the worldwide money speculations of the financial dark ones, nothing has been practically done to stop their global fraud.

Basel III, the new bank accounting system, was for instance wrapped up and postponed for the time after Ascension. Please observe that all important reforms, which the elected governments announced loudly in the last several years as to cope with the current financial and economic crisis, were scheduled after 2012 in the full knowledge of the upcoming Ascension. Only the stupid public and the journalists are not aware of this “time-dependent” fraud.

The Fed, being the chief instrument of the American financial Elite, committed every possible crime to make its proprietors, the Wall Street banks, richer at the expense of the American people. “Enriches vous!” was the cry of the dark financial ones during the last two decades that reverberated around the globe.

When the financial collapse came in 2008, the strings of the elected puppet governments in the Western World could no longer be hidden to the public, after they announced one huge bailout after the other on behalf of the big banks – be they American or European banks, even at a time when the default of many national states became an imminent danger. The *draconian* (please observe the semantic identity of the word “draconian” with the economic policy of the Orion Reptilians from the *Draco* constellation) austerity programmes in England, Greece, Ireland, Spain, Portugal, and many other western countries announced in 2010 will, however, not save them from falling into the abyss of their gargantuan fiscal debt.

But these Draconian (Reptilian) austerity programmes have already ignited the revolutionary mood of the stricken people in these countries, who have begun to discern more clearly the clandestine methods of their masters to first impoverish them and then enslave them under the banner of the New World Order. This revolutionary mood will explode this year to a true revolution of the masses.

It has always been the plan of the dark ones to eliminate the national states by defaulting them and delegating their sovereign rights to a new international institution, for instance, to the United Nations that has been planned to execute the power of the New World Order at the beginning. The United Nations have always been firmly in the hands of the dark ones, who control them through their New York banks nearby, whose policy has always been to bribe and corrupt most of the representatives of this international institution.

This scenario has already been tested on a smaller scale in the creation of the European Union. The latter received recently a constitution that was bargained by its bribed politicians behind closed doors and has not been approved by the electorate in a free vote. This constitution and the executive EU-institutions that are appointed by the hidden governments of these countries have already water-downed many sovereign rights of the people of the EU-nations, who are not even aware of their losses of basic rights. The New World Order was supposed to come in a similar way, like a “thief in the night” and catch the masses by surprise.

In this context, it is important to observe that the creation of EU was part of the Rothschild-plan to establish the New World Order and was promoted by the Bilderberger group, which was hastily summoned after the Second World War. This clandestine organisation has its hands in virtually all important political decisions in Western Europe and in many other places around the world. All heads of important European states need the initial confirmation of the Bilderberger group, before they can be nominated for elections.

*

This information was given to explain how the western governments were used by the dark forces to forge the financial collapse of their countries by implementing Keynes theory of anti-cyclic intervention in an excessive manner. This theory was never intended to establish stable economic growth for the benefit of the masses, as its author might have believed, but to promote the hidden agenda of the Powers That Be. This is the insidious economic policy of the Orion Empire, which it has successfully implemented on many planets in this galaxy in order to subjugate their incarnated populations. These reptilians have huge experience in this.

The application of the theory of monetarism was not less hideous. First and foremost, the Chicago boys, the spiritual fathers of this theory, forgot to tell the public that the central bank, which they wanted to give an unlimited economic power in their theory, was not the central bank of the American people, but the private bank Fed, which is possessed by the banks of the dark ones on Wall Street.

Equally important was the fact that the hidden governments and the financial Elite did not intend to use the variable interest rates of the central bank to promote true economic growth, but to solidify the position of the financial sector in the overall economy by creating monopolistic international bank corporations. Ultimately, this led to the precarious situation of “too big to fail”, with which the dark ones blackmailed the elected governments of the western countries. This Damocles sward is still hanging over the heads of the elected governments and will definitely fall this year to unleash the final crash of the Orion monetary system.

In order to strengthen the position of the financial Elite, Greenspan and his successor Bernanke lowered the interest rates for long periods of time in order to create speculative bubbles, from which the banks profited by creating fraudulent financial products and selling them to the rest of the world. Even when the Fed raised interest rates, as it was the case in the early 80s, the banks were the only institutions that profited from these high interest rates, while the population was further impoverished.

Currently the American banks borrow money from the Fed at zero interest rates and buy bonds at 3-4%. The difference is paid by the American people as docile tax payers. This is the greatest scam, any country could possibly create, and it takes place in front of the very eyes of all American citizens, who should have revolted long time ago against this obvious crime.

Therefore, it is not an exaggeration to say that the inventor-nation of all fraudulent financial products of the 20th century has, at the same time, dumped down its citizens to an even greater extent than the communist dictatorships did with their peoples during the Cold War. The major difference is that the peoples in Eastern Europe never trusted their red dictators, while the majority of the American people still believe that they live in the most democratic and advanced country in the world. Their blindness and sheepishness exceed anything mankind has experienced so far. The American people, the citizens of the new Roman Empire of Modern times, have been degraded to spiritual pariah by their dark ones. What a shame!

*

It is a leitmotif of this essay that the Powers That Be have falsified any intellectual or social effort of mankind in the past to achieve true progress. The most insidious falsifications have been made in the realm of theoretical science, as the author has extensively shown in this discussion. This is particularly true for the theory of economics, which is much broadly represented at universities and high schools than all natural sciences put together.

Let us not forget that millions of young people attend universities and high schools and indebt themselves for their whole life by paying huge fees, only to study faked economic theories, the only purpose of which is to deepen the state of enslavement of mankind. The present-day situation on earth prior to Ascension is, indeed, disgusting, and it is most disgusting in the USA – the citadel of the dark forces on this planet. Therefore, the financial and economic collapse will begin this year in this country and will eliminate it as a world power once and for all.

In the 5th dimension, there will be no countries and no nations. Humanity will perceive its true nature as a galactic civilisation of multidimensional beings. Communication will be through telepathy, and money will only exist in the imagination of some entities, who will still stick to their out-dated pecuniary 3d-beliefs.

These hilarious circumstances should be experienced on earth in advance under the energetic limitations of 3d-reality during the End Times. Therefore, it is not a punishment, but a privilege to be unemployed at this time and to not contribute to the prolongation of the Orion economic system. It is no coincidence that the rate of unemployment has doubled in the Western world during the current depression and will skyrocket this year. This will be in anticipation of the conditions of life in the 5th dimension, where there will be no necessity to work in order to survive, as all entities are immortal powerful creators of their destiny.

The Orion Empire on the other hand has degraded humanity to working mass force. It is therefore not a privilege to work for the Orion Empire and their human proxies – employment, as it is exerted on earth today, is not a basic human right, but the most insidious form of human enslavement.

Economic education of the ascended population will begin immediately after Ascension in small groups that will be taught by highly evolved entities. One can imagine how some of the current politicians such as Obama will awaken in the 5th dimension and find themselves to be students in such educational courses. In their confusion they may begin to ask: “Where is America? Where is Europe, and what happened with the White House?”

The truth will be that all these political constructions and centres of power will no longer exist in the 5th dimension. The ascended entities will find themselves under the loving supervision of highly evolved beings such as the author of this essay and will experience for the first time in their life what true abundance free of fear and effort really means. But this is another story.
